## EDUCATION

### **Austin Coding Academy, Austin, Tx — C#/ASP.NET Full Stack**

April 2018 - January 2019

Learned full stack development starting with Html and CSS design. By the end of the course I was able to build applications using C# as well as the ASP.NET framework.

### **The Actor's School Continuing Education, Austin, Tx**

August 2016 - September 2017

Explored many mediums to increase my interpersonal skills like professional vocal training, improv development, and public speaking.

### **Austin Community College, Austin, Tx — Music Business, Production, and Technology**

August 2014 - December 2016

Explored different means of recording and capturing music through different technologies, as well as covering ground in the business side of things.

## WORK EXPERIENCE

**Austin Coding Academy Student Tutor** Jan. 2019 - Current

I was hired on by my school to help tutor current students in HTML, CSS, Javascript/React, and C#/ASP.NET Core. I am able to help out the students by guiding them through writing code for their assignments, answering questions, and helping to navigate GIT.

## PREVIOUS WORK EXPERIENCE

Sandwich Artist

Summer Camp Music Specialist

Public Ground Transportation Chauffeur

## PROJECTS

### **Tomato Pizza Cafe — Pizza Ordering Application**

My partner and I created this application and included a detailed identity layout to include customers and admins using the C#/ASP.NET Core framework alongside SQL.

### **Towers Of Hanoi — Console App Game**

I designed this game using C# to implement and mimic the rules of this game. I developed an original feature which allows the user to input how many blocks they would like to use.

### **Checkers — Console App Game**

I built this game with the C# language to emulate the classic game. Creating an interactive grid in the console was a major obstacle to overcome.

## TECHNICAL SKILLS

C#/ASP.NETCore

Html/CSS

Git/Powershell

Javascript/React

SQL

## PERSONAL SKILLS

Communication

Adaptability
